Bachelor's degree graduate in Informatics Engineering with a focus on **Full-Stack Web Development** and a strong background in **UI/UX and Graphic Design**. Experienced in developing web-based applications using **Laravel, MySQL, and REST APIs**, as well as collaborating in startup and team-based environments. Combines backend logic and database skills with design sensibility to deliver **functional, user-centered, and visually intuitive applications**, from the requirement analysis through implementation.

EDUCATION

Trunodjoyo Madura University

Bachelor's Degree in Informatics Engineering (GPA 3.70/4.00)

August 2021 - Oct 2025

- **Thesis:** Hyperparameter Algoritma Random Forest Dengan Random Search Untuk Klasifikasi Lumpy Skin Disease (LSD) Pada Ternak Sapi Berdasarkan Faktor Lingkungan.
- **Areas of Interest:** Full-Stack Web Development, Software Engineering, Database Systems.
- **Scholarship:** Sahabat Kabupaten Sampang Scholarship (Bidikmisi), 2024 – 2025.

WEB DEVELOPMENT EXPERIENCE

PT Weza Punya Cerita

Feb - Jun 2024

Web Developer Intern

- Designed and developed a **web-based Gizi Checker application** using **Laravel framework version 9** and **MySQL** for health service use.
- Implemented **BMI** and **daily calorie requirement calculations** based on **5 biometric parameters** (height, weight, age, gender, activity level).
- Designed and managed a **relational database with 4 main tables** (users, food, bodies, calories) to store and process users' daily nutrition intake data.
- Conducted a **nutrition data survey covering >200 food items**, including name of food, weight, calorie per gram, URT (household serving units), calorie per serving, and food categories.
- Developed **user and admin dashboards** to visualize daily calorie intake history and BMI records, enabling centralized monitoring of user data.
- Integrated **Express.js API** for nutrition data processing.
- Handled **UI/UX design using Figma and use case modeling** to ensure clear user flow and efficient application functionality.

Tech Stack: Laravel, MySQL, Express.js, JavaScript, HTML, CSS, Figma

Full-stack Project: Restaurant Management System

Sep - Dec 2023

Software Engineering Course

- Collaborated in a **5-member team** to develop a web-based dine-in ordering system aimed at digitalizing restaurant operations.
- Performed **user requirement analysis and workflow design** to translate restaurant needs into application features.
- Fully responsible for **UI/UX design across 5 application pages** and **business process modeling (use case design)**.
- Implemented **dynamic menu management and table reservation features** to improve customer ordering experience.
- Conducted **user testing with ±28 users** during academic presentation and **real-world testing with >50 customers** at a partnered local restaurant (UMKM).
- Application is currently **used internally on a local server (localhost)** for daily restaurant operations.

Tech Stack: MySQL, JavaScript, HTML, CSS, Figma

Web Game Project: Memory Card Game

Oct - Nov 2023

Self Employed (Freelance)

- Developed an interactive **memory card game** using **JavaScript, HTML, and CSS**.
- Implemented **real-time scoring logic** and a **20-second countdown timer**, requiring players to match **14 cards** to win.
- Optimized application for **responsive display**, supporting both **mobile and desktop** devices.
- Designed clear user feedback for game status (win/lose) and final score display.

Tech Stack: JavaScript, HTML5, CSS3

DESIGN & CREATIVE EXPERIENCE

Rumah Roster Malang - [@rumahrostermalang](#)
Graphic Designer & Video Editor

Oct 2023 - Feb 2024

- Created **promotional and informative video content** using **Capcut Video Editor** with a **total reach of more than 1,800 views**.
- Designed **more than 30 Instagram feed posts** using **Figma** to promote Rumah Roster Malang product patterns, **achieving** a total of **400+ likes**.
- Developed a sales catalog to support product marketing activities using **Figma**.

Luar Kelas - [@klasify.id](#)
Graphic & Product Designer Intern

Sep - Dec 2023

- Led the development of **visual designs for children’s educational products**, from the **concept stage** to **packaging design** using **Figma**.
- Integrated **functionality** and aesthetic aspects into **packaging design**.
- Designed and produced **six products**, including **card games, packaging, and board games** such as Hansel Cards, Alphabet Cards, and Snakes and Ladders (Educational Edition) using **Figma**.
- **Supported marketing needs** by designing gift boxes, stickers, and price posters using **Figma** and **Canva**.

Metalearn - [@metalearn.id](#)
Graphic Designer Intern

Mar - May 2023

- Created **more than 20 informative Instagram feed designs** using Canva with a total of **300+ engagements (likes)**.
- Designed supporting visual assets for event campaign needs using Canva.

ORGANIZATIONAL EXPERIENCE

Google Developer Student Club - [@gdgoc.trunojoyo](#)
Media & Creative Devision

Sep 2023 - 2024

- Created the **official mascot** as the visual identity of **GDSC Trunojoyo University**, successfully strengthening community branding, the **entire Illustration was Hand-drawing** using **Ibis PainX**.
- Designed and **produced 60+ Instagram visual contents** using **Figma** with a total of **1,200+ likes**.
- Designed and presented **event posters** using Figma that effectively increased participant engagement.

Information Technology Center (ITC) - [@ukmft_itc](#)
Infokom Devision

Oct 2022 - Jul 2023

- Increased account **engagement** through **Instagram feed and story designs** using **Canva**, **achieving 1,000+ likes and views**.
- Designed **20 promotional posters** using **Canva**, for various organizational activities.
- **Increased followers to 800+** through **content design optimization and audience interaction**.

SKILLS

- **Frontend:** JavaScript, HTML5, CSS3.
- **Backend & Database:** PHP (Laravel), SQL, RESTful API Integration, Express.js
- **Tools:** Git, GitHub.
- **Design Tools:** Figma, Canva, Adobe Illustrator.
- **Productivity Tools:** Microsoft Office, Google Workspace
- **Graphic & Product Design:** Social Media Content Design, Layout Design, Packaging Design, Educational Product Design, Poster Creation, And Illustration.
- **Soft Skills:** Problem Solving, Team Collaboration, Detail-oriented, Time Management

CERTIFICATIONS

- **Coding Camp Software Engineering** - RevoU
Module: Web Development Basics (HTML5, CSS3, Javascript, JQuery, Bootstrap, GitHub Deployment)
- **DSF18 – UI/UX Design** - Dibimbing
Module: Design Thinking, User Research & Persona, Wireframing & Prototyping (Figma), Usability Testing.
- **Database Foundations & Database Design** - Oracle Academy
Module: Database Concepts & Relational Model, SQL Fundamentals, Database Design & Normalization, Entity Relationship Diagram (ERD)
